

Rethink cloud operations with **Cisco Intersight**

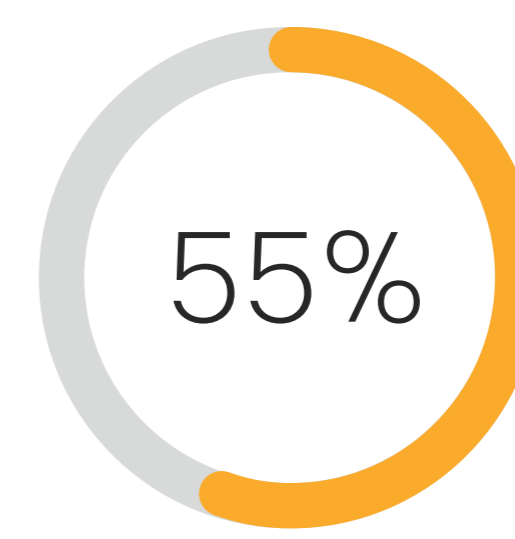

The “always-on” digital world increases pressure on IT operations teams.

43% of organizations want to release new changes weekly or more frequently¹

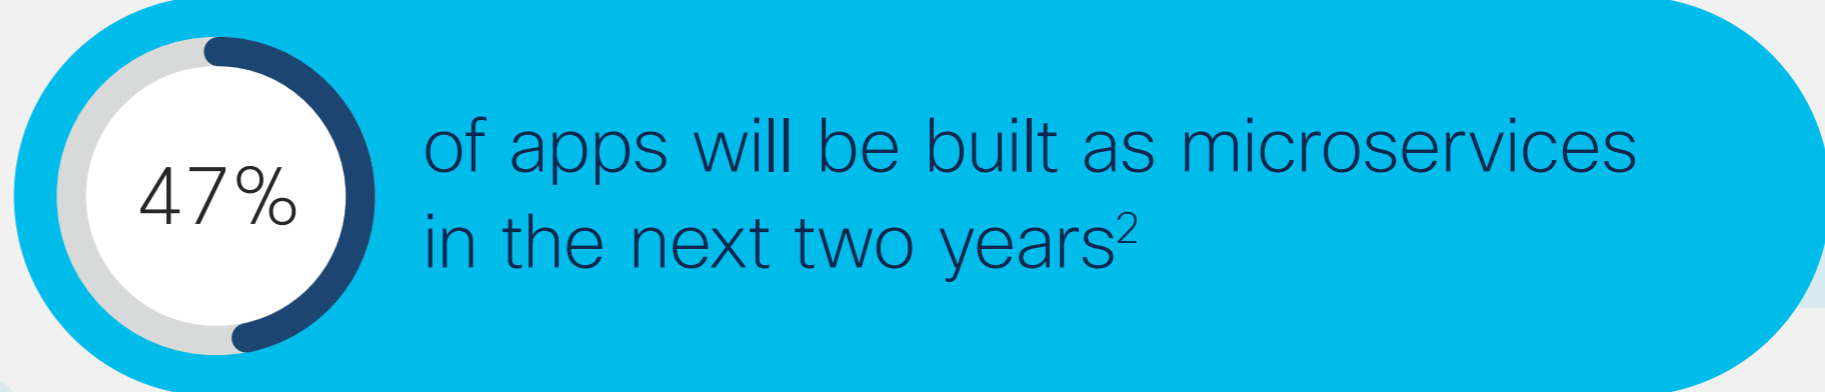

Restore service goals are between one hour and one day¹

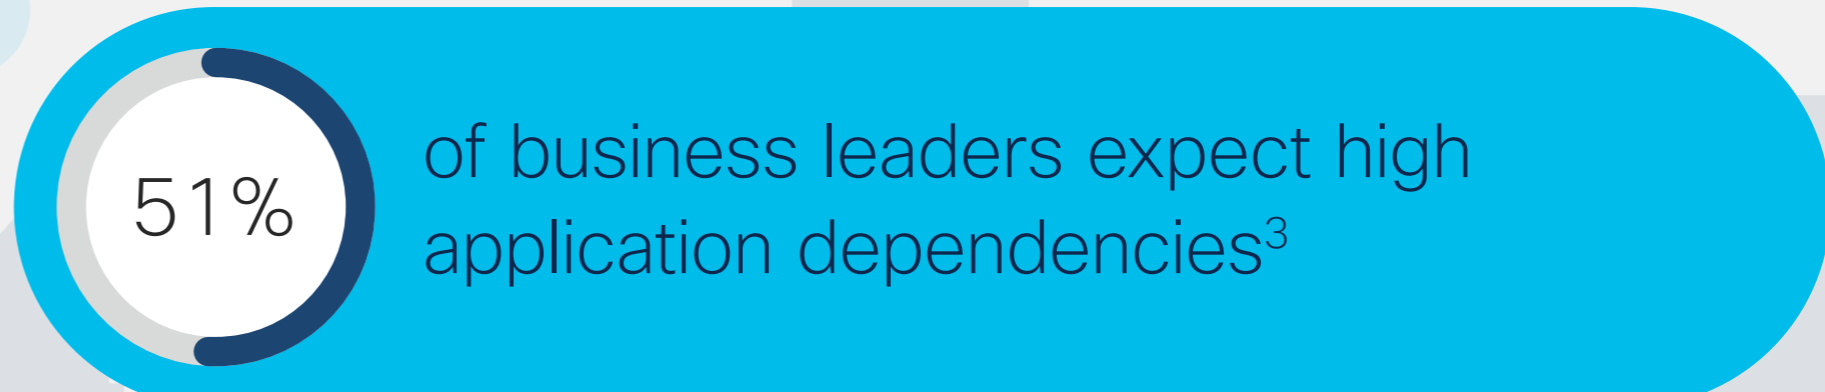

Number of applications created by businesses will rise by 55% in two years²

IT teams must evolve to **keep pace with the speed of innovation**, working across an increasingly complex, distributed, hybrid IT world.

47% of apps will be built as microservices in the next two years²

51% of business leaders expect high application dependencies³

70% of business initiatives will require metrics on digital experience by 2025⁴

Failing to master this new world can lead to:

Inability to drive the business forward

Poor application performance

Unsatisfied customers

Unnecessary costs from overprovisioning

Time wasted in troubleshooting

Delays in service from manual tasks

Time to rethink cloud operations.

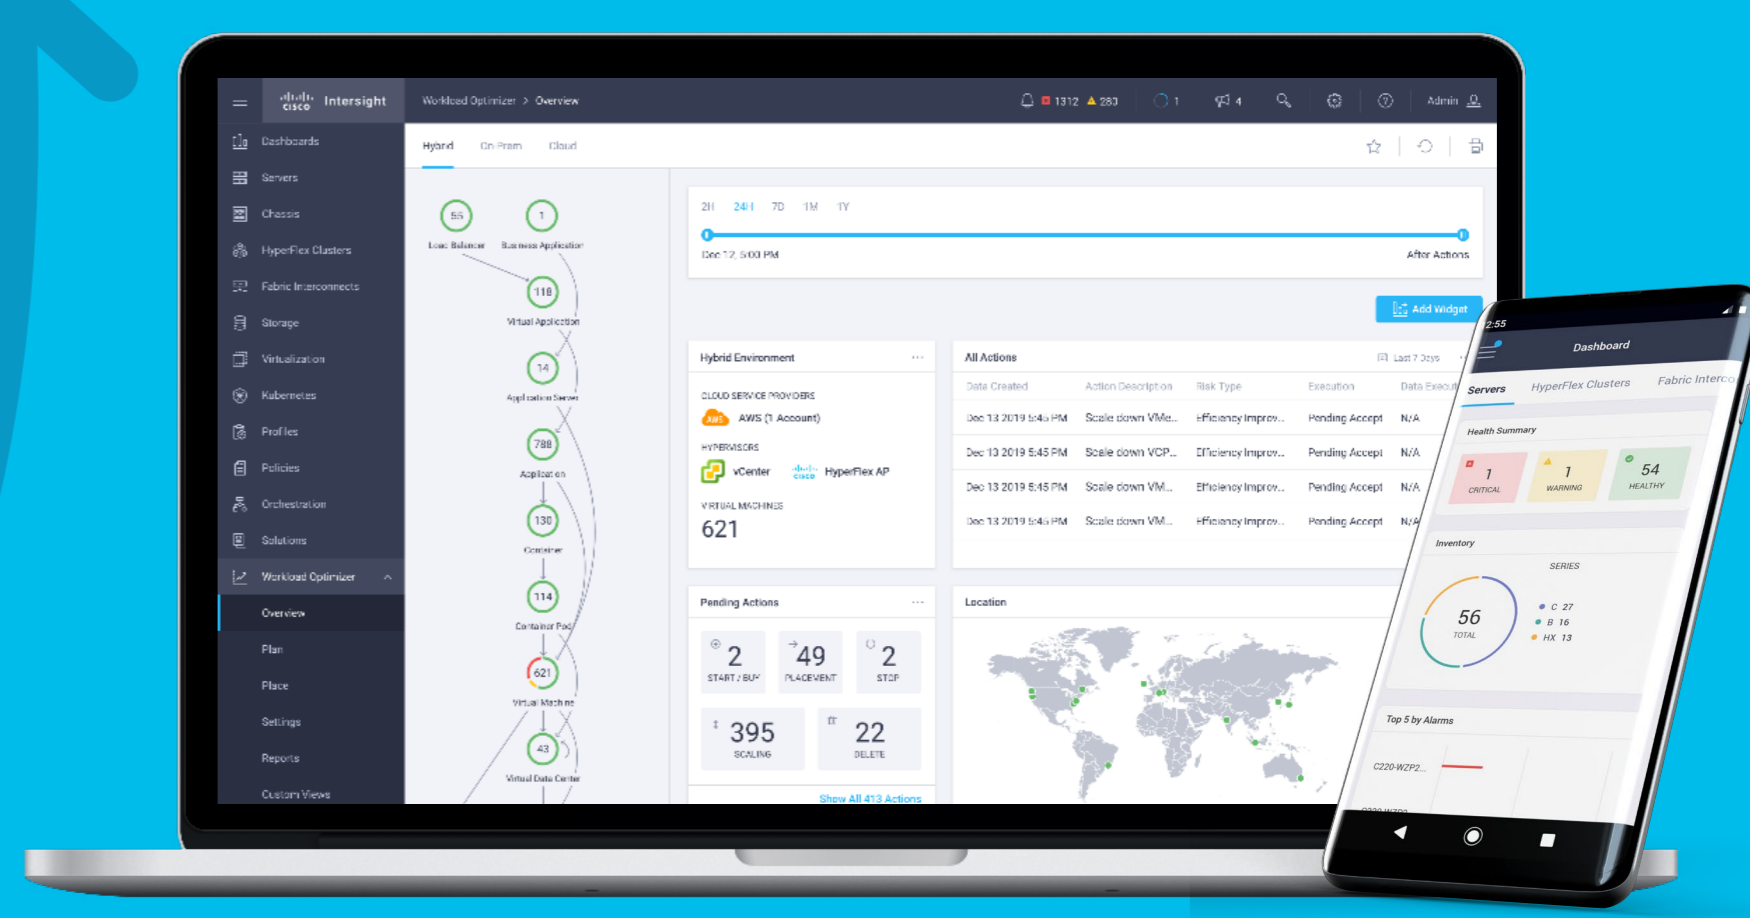

Cisco Intersight™ provides an essential control point to gain more value from your hybrid IT investments across on-premises, the edge, and public clouds. Continuously optimize your environment, accelerate service delivery, and adapt to your business needs.

Connect people and technology in a hybrid IT environment.

Agile delivery to accelerate service delivery and enable developers with an open framework

Transform and scale with AIOps to ensure application performance, reduce cost, and mitigate risk

Simplify operations with secure, cloud-delivered management

Bridge the gap between infrastructure and applications with Cisco Intersight services.

Intersight infrastructure service

Leverage intelligent lifecycle management for Cisco® data center products.

Intersight Workload Optimizer

Revolutionize how you manage application resources across any environment with full-stack, real-time visibility.

Intersight Kubernetes service

Simplify production-grade, multicloud Kubernetes management.

The path to mastering hybrid IT begins with Cisco Intersight.
